

ROHIT KUMAR DUBEY

(+44) 07393109551 | dubeysmail@gmail.com | [LinkedIn](#) | [Portfolio](#) | Glasgow, United Kingdom

PROFESSIONAL SUMMARY

Applied **AI Engineer** with hands-on experience designing and deploying **multi-agent LLM systems**, **RAG pipelines**, and **AI automation workflows** using **Python**, **LangChain**, **FastAPI**, **n8n**, and **Claude API**. Shipped production-grade systems including a seven-agent **NHS health assistant** with **confidence gating** and **human-in-the-loop escalation**, a **citation-enforced legal contract analysis** tool, and a **Claude Vision** sales automation pipeline processing enquiries in under 30 seconds. Strong **DevOps** foundation across **AWS**, **Docker**, and **Kubernetes**.

EDUCATION

Computing Science, M.Sc. | University of Glasgow

Sep. 2023 – Jul. 2025

Coursework: Programming and Systems Development, Machine Learning and AI for Data Scientists, Deep Learning, Big Data Systems, Secured Software Engineering, Internet Technology

SKILLS

AI & Automation: AI Agents, Multi-Agent Orchestration, Workflow Automation, **n8n**, LLM Integration, Prompt Engineering, Retrieval Augmented Generation (RAG), LangChain, Conversational Memory, Confidence Scoring, Human-in-the-Loop Systems, Agentic Workflows, Claude API, Groq, LLaMA, Hugging Face, OpenAI API

Programming, Cloud & Data: Python, Java, SQL, Bash, REST APIs, FastAPI, Next.js, Streamlit, JSON, Webhooks, AWS, Azure, Docker, Kubernetes, CI/CD, Terraform, Git, Linux, Cloudflare, Supabase, PostgreSQL, pgvector, ChromaDB, Data Preprocessing, EDA, Feature Engineering, Power BI

PROJECTS

EnquiryFlow: AI Powered Sales Enquiry Processor | Claude API, n8n, Gmail API, Google Sheets

Apr. 2026

- Built an **end-to-end AI automation** pipeline integrating **Claude API** and **Gmail API** via **n8n**, automatically extracting **structured JSON** from customer enquiry emails and technical drawings with zero manual data entry.
- Engineered **dual-path routing** with **Claude Vision** for SVG drawing extraction and **confidence scoring** (0.0–1.0), achieving **0.92+ accuracy** across **20+ real-world test runs** in **under 30 seconds**.

AskNora: AI Powered NHS Health Assistant | n8n, Groq LLaMA 3.3 70B, Supabase, Next.js, Vercel

Feb. 2026

- Designed a **safety-focused multi-agent RAG system** with seven **specialist AI agents**, routing patient queries across 7 intent categories using **LLaMA 3.3 70B** and **Supabase** vector search.
- Engineered **confidence gating** (threshold: 0.7) and **human-in-the-loop escalation** with hardcoded **emergency routing**, achieving consistent **above 0.7 accuracy** across **100+ test conversations**.

ContractIQ: RAG Based Legal Contract Analysis | Python, FastAPI, LLMs, ChromaDB, Streamlit

Jan. 2026

- Built a **clause-grounded** legal contract analysis system addressing **hallucination** and trust failures in generic LLM tools, prioritising **precision** and **citation-backed** outputs over broad answer coverage.
- Implemented a **Retrieval Augmented Generation (RAG)** pipeline with **clause-aware chunking**, **ChromaDB** vector store, and automatic refusal enforcing **100% citation-backed responses** when retrieval confidence was insufficient.

EXPERIENCE

AI Automation Engineer | Chilos Burger Ltd. | Glasgow, United Kingdom

Jun. 2024 – Present

- Identified key **automation opportunities** across **invoice and payroll**, **stock and inventory management**, and **customer support** workflows in a fast-paced food retail environment to reduce operational overhead.
- Designed and deployed **end-to-end n8n automation pipelines** with **human-in-the-loop** manager routing, reducing manual processing time by **40%** and improving **operational accuracy** across billing, scheduling, and feedback handling.

Junior DevOps Engineer | BN Technology | Ghaziabad, India

Aug. 2022 – Sep. 2023

- Designed and implemented **CI/CD pipelines** using **Terraform**, **Docker**, and **Kubernetes** across **AWS** and Oracle Cloud, reducing **deployment time** by **35%** and improving release reliability across multiple client-facing platforms.
- Standardised **automated deployment** and **cloud infrastructure** processes across development and production environments, reducing environment inconsistencies and manual intervention significantly.

CERTIFICATIONS & ACHIEVEMENTS

- Claude Code 101**, **AI Fluency: Framework Foundations** | Anthropic
- Microsoft Azure Fundamentals AZ - 900** | Microsoft
